

VESCO SCIENCE — HOME PAGE

01. HERO — First Screen

Agr koi video apko lab ki mil jay licenced to wo b ap use kr skty hyn

Main Heading

Advancing Regenerative Biotechnology

Subheading

From scientific discovery to scalable manufacturing.

Vesco Science develops advanced biotechnology solutions through integrated **R&D, formulation, manufacturing and quality systems.**

Buttons:

Explore Our Technology

02. TRUST / CAPABILITY BAR

Hero ke neeche ek clean horizontal strip:

R&D Driven
Advanced Manufacturing
Exosome Technology
Regenerative Platforms
OEM / ODM

03. ABOUT VESCO

Small heading

WHO WE ARE

Main heading

Where Biotechnology Meets Manufacturing

Short copy:

Vesco Science combines biotechnology research, formulation expertise and manufacturing capabilities to develop advanced solutions for regenerative medicine, aesthetics and professional healthcare markets.

Side mein:

Lab / scientist / facility image

Button:

Discover Vesco Science →

04. CORE TECHNOLOGY

Ye homepage ka **major section** hy.

Heading

Technology at the Cellular Level

4 cards:

01

Exosome Technology

Extracellular vesicle development, purification, characterization and formulation.

02

PDRN / PN Technology

Advanced regenerative material platforms and formulation development.

03

Peptide Technology

Bioactive peptide and peptide-complex formulation capabilities.

04

HA & Regenerative Formulation

Hyaluronic acid and advanced aesthetic/regenerative formulations.

Button:

Explore All Technologies →

05. EXOSOME FEATURE SECTION

Yahan Vesco ka strongest technology platform visually highlight karein.

Left:

EXOSOME TECHNOLOGY

From Cellular Source to Characterized Product

06. MANUFACTURING

Heading

From R&D to Scalable Manufacturing

Copy:

Our integrated development approach connects research, formulation, production and quality control to support the transition from concept to commercial manufacturing.

Phir 4 steps:

R&D → Development → Production → Quality

Button:

Explore Manufacturing →

07. QUALITY

White/light-blue section.

Heading

Quality Built Into Every Stage

6 small points:

- Raw Material Control
- Process Control
- Analytical Testing
- Microbiological Testing
- Batch Traceability
- Storage & Distribution

Button:

Our Quality System →

QUALITY & CONTROL

Quality Built Into Every Stage

From raw materials to final distribution, quality is integrated throughout our development and manufacturing process.

01

Raw Material Control

Controlled evaluation of high-quality raw materials.

02

Process Control

Defined and monitored manufacturing processes.

03

Analytical Testing

Advanced analytical methods for reliable quality assessment.

04

Microbiological Testing

Relevant microbiological evaluation for product safety.

05

Batch Traceability

Complete documentation and traceability for every batch.

06

Storage & Distribution

Controlled storage and secure distribution worldwide.
